From discomfort COMES INSPIRATION!

A MESSAGE FROM CHAIRMAN/CEO HOWARD BARIUM

As you sit in your SkyHigh seat with your knees tucked cozily beneath your chin, thumbing through the pages of Necessities, you'll no doubt say to yourself, "Wow, that's precisely the travel convenience product I need! How did they know?" Well, to let you in on a little secret, you told us!

Each ingenious, reasonably priced item we feature was inspired by an actual passenger complaint letter or lawsuit. It's all part of my continuing efforts to sell you things that will help you not mind flying with SkyHigh so darn much.

So keep that constructive criticism coming, and we'll do our best to keep offering you products that help calm whichever bee is currently in your bonnet.

Happy shopping. I think you'll find it, as I like to say, "Good stuff."

Howard Barium,
Chairman/CEO, SkyHigh
Airlines.

What crying baby?

Happy Baby Sonic Isopod

A quiet flight is in the bag—or pod, rather! Nothing can spoil a flight like an unhappy infant. Thankfully, the engineers at SkyHigh solved the problem. After experimenting with a variety of corks, gags and tranquilizing darts, the Happy Baby Sonic Isopod was born. Made of impact-resistant polycarbonate, it offers the angry pink little person a comfortable sonic womb. Simply snap the baby into the container and viola!...silence. Infant care is handled through several conveniently located Baby Maintenance Ports. A digital decibel meter lets you read the level of infant distress without actually having to hear it. If you want them to shut up, shut them up in the Happy Baby Sonic Isopod.
